

How to do it: 3 Simple Steps

1. **Turn the whole number into a fraction:** Put the whole number over 1. For example, you have 4, write it as $\frac{4}{1}$.
2. **Multiply straight across:** Multiply the two numerators together and the two denominators together.
3. **Simplify your answer:** If the result is an improper fraction (where the top is bigger than the bottom), turn it into a mixed number. 

Multiplying fractions

Directions: Multiply and write the answer.

$$1 \times \frac{3}{4} =$$

$$7 \times \frac{2}{3} =$$

$$8 \times \frac{4}{10} =$$

$$2 \times \frac{2}{4} =$$

$$5 \times \frac{1}{2} =$$

$$5 \times \frac{2}{5} =$$

$$6 \times \frac{2}{8} =$$

$$1 \times \frac{4}{12} =$$

$$9 \times \frac{1}{6} =$$

$$2 \times \frac{7}{10} =$$

$$6 \times \frac{2}{3} =$$

$$6 \times \frac{2}{6} =$$

$$6 \times \frac{2}{8} =$$

$$7 \times \frac{2}{4} =$$
